PROFESSIONAL SUMMARY

Technical Project Manager with 4+ years of experience leading cross-functional technology and digital projects from planning through launch and ongoing operations. Led a 9-month product launch at Trimly, currently leads development of Valto, an AI-powered hospitality SaaS platform, and previously managed a 12-channel digital portfolio for a US company. Experienced in hybrid and incremental delivery, Agile sprints, scope and requirements management, stakeholder coordination, risk and dependency management, launch readiness, feature acceptance, and data-informed optimization.

WORK EXPERIENCE

Lead Project Manager | 09/2025 - Present

Valto · Nigeria

- Advanced an AI-powered hospitality platform from concept into active development, coordinating **2 software developers and 1 product designer** across requirements definition, design approval, and implementation.
- Established an approved **incremental delivery approach** supported by ClickUp, organizing work into dependency-based packages with clear ownership, review checkpoints, and integrated end-to-end testing before feature acceptance.
- Resolved a business-verification provider-selection blocker by coordinating an engineering-led alternatives review, resulting in approval of a **lower-cost provider** and a clear path into architecture planning.
- Identified pre-launch staffing gaps and outstanding budget commitments by reconciling developer and designer contract timelines with delivery plans, bringing resource-extension and funding decisions into project planning.

Project Manager | 10/2025 - 06/2026

Trimly · Ibadan, Nigeria

- Led a **9-month product launch** from project definition through public launch and post-launch stabilization, coordinating an **8-person cross-functional team** across product, engineering, design, and operations.
- Managed delivery in Jira using a hybrid approach, combining **1-2 week Agile development sprints** with milestone-based planning for operational readiness, soft launch, go-live, and handover.
- Defined and protected the MVP launch scope, prioritizing the web booking platform, Paystack payments, barber onboarding, job allocation, and customer-support workflows while controlling non-critical feature requests.
- Converted previously manual booking and service operations into a live web and WhatsApp-enabled workflow, aligning product, engineering, design, and operations for launch readiness.
- Managed delivery risks, dependencies, testing, and stakeholder priorities, completing the project **within budget** and three weeks behind the original schedule.
- Delivered a platform achieving **99% uptime, 97% payment success, and 76% booking completion**, supporting **50 active barbers, 210 completed bookings, and a 24% 30-day repeat rate** within the first three months.

Channel Operations Manager | 03/2022 - 08/2026

Faceless Freedom LLC · Florida, United States

- Led a channel turnaround that produced a **395K-view video**, nearly **10x** the previous ~40K-view average, by coordinating changes to content strategy, team performance, and production execution.
- Led approximately **8 channel rebuild and takeover projects** across a **12-channel portfolio**, moving initiatives from performance assessment and planning through resource allocation, execution, and transition to ongoing operations.
- Supported production of up to **7 video deliverables per week per channel**, coordinating up to **3 concurrent projects** and teams of up to **10** through Asana, with scripts, voiceovers, and editing sequenced around production dependencies.
- Contributed to further results including a **107K-view video at approximately 5x typical performance** and a **1.86M-view initiative**, using published-video performance data to refine topics, titles, thumbnails, and content direction.

■ Maintained production continuity when critical contributors became unavailable, reallocating work and using documented workflows, quality standards, and contingency plans to sustain delivery.

ACADEMIC HISTORY

Federal University of Technology Akure (FUTA) | 2019-2024

Bachelor of Technology - Physics Electronics

Akure, Nigeria

TOOLS

Project Management

ClickUp, Jira, Asana

Delivery Approaches

Hybrid, Incremental, Agile Sprints, Milestone-Based Planning

Planning & Reporting

Google Sheets

Collaboration & Communication

Google Drive, Google Workspace, Figma, Slack, WhatsApp

CORE SKILLS

Project Planning & Execution, Cross-Functional Team Leadership, Stakeholder Management, Scope & Requirements Management, Schedule & Milestone Management, Risk & Issue Management, Dependency Management, Resource Coordination, Launch Readiness, Feature Acceptance & Testing, KPI & Performance Tracking, Quality Management, Project Prioritization, Process Improvement, Vendor & Agency Coordination, SOP Development.
