PROJECT DELIVERY CASE STUDY

FACELESS FREEDOM

Rebuilding channels through stronger production delivery

Precious Olusayo

Channel Operations Manager

March 2022 - August 2026

395K views on a turnaround video vs. the previous ~40K average per video

12-channel portfolio

Faceless Freedom LLC | Remote

Improve performance. Make production dependable.

The work combined channel rebuilds, remote team coordination and ongoing video production.

THE TURNAROUND CHALLENGE

The channel needed stronger direction and delivery.

It was underperforming while missed deadlines, uneven work and repeated follow-up disrupted production.

01 Deadline reliability

Slow completion and missed handoffs affected planned uploads.

02 Quality and feedback

Submissions varied in quality, and feedback was not consistently applied.

03 Clear ownership

Work required repeated follow-up to reach completion.

My remit: turn channel priorities into a coordinated plan, then manage the work through production and review.

One delivery system across people and channels.

I managed planning, resources, production, performance review and transition to operations.

12
channels in the portfolio

~8
rebuild / takeover projects

Up to 3
concurrent projects

Up to 10
people in a team

01 Assess and plan

Research channel performance, set direction and organize the work needed for a rebuild or takeover.

02 Build and coordinate teams

Recruit and assess contributors, allocate work and manage responsibilities across production roles.

03 Control production

Assign deadlines, coordinate dependencies and use documented workflows and quality standards.

04 Review and transition

Monitor delivery and published results, communicate progress and move projects into ongoing operations.

Clear handoffs kept the production chain moving.

Asana supported coordination across sequential production stages, with quality review before publication.

SEQUENTIAL PRODUCTION

Title + thumbnail preparation

01	02	03	04	05
Script	**Voiceover**	**Editing**	**Quality review**	**Publishing**
Writing	Voice production	Video assembly	Review + feedback	Release the video

PERFORMANCE FEEDBACK

Published-video results informed the next topics, titles, thumbnails and content direction.

Improve content direction and production together.

I coordinated the turnaround across strategy, contributor performance and production execution.

01 / CONTENT DIRECTION

Rebuilt the strategy

I assessed the channel's performance and coordinated changes to its content direction. Published-video results informed decisions about topics, titles and thumbnails.

Audience response informed the next round of content decisions.

02 / PRODUCTION EXECUTION

Carried the changes into delivery

I coordinated contributor performance and production execution so the revised direction could become completed videos. My wider delivery approach used deadlines, quality standards and active follow-up.

Content decisions and the work needed to deliver them stayed connected.

Keep publishing when a contributor is unavailable.

One production incident shows how I used prepared alternatives to keep work moving.

THE SITUATION

A thumbnail designer became unavailable.

I tried to contact the designer. Thumbnails were already prepared for some videos, so I selected one of those videos for publication.

THE RESPONSE

01 **Attempt contact**
Try to resolve the immediate gap.

02 **Use prepared work**
Select a video with its thumbnail ready.

03 **Continue publication**
Move forward with the available alternative.

The wider approach: reallocate work, use documented workflows and maintain quality expectations.

The result: stronger video performance.

Selected video outcomes, alongside the scale of production I coordinated.

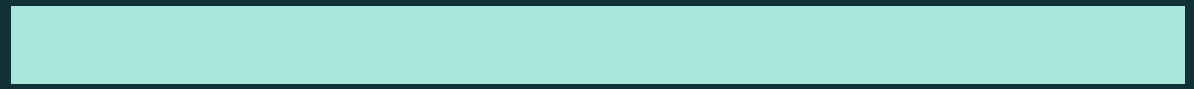

TURNAROUND COMPARISON

Previous average views per video

~40K

Views on the turnaround video

395K

Nearly 10x the previous average

Single-video result compared with the channel's previous average views per video.

My contribution: strategy and delivery coordination. View counts are team / project outcomes.

Sources: reported career-profile outcomes and project account supplied by Precious Olusayo.

107K

Views on a further video

Approximately 5x typical performance

PRODUCTION SCOPE

Up to 7

video deliverables per week per channel

Turning priorities into dependable delivery.

Remote project leadership, from channel assessment and rebuild to ongoing production.

01 Turn priorities into executable work

Translate performance problems into a plan, clear responsibilities, resource decisions and production schedules.

02 Coordinate people and dependencies

Connect writers, voice artists, editors and designers across concurrent projects and dependent handoffs.

03 Adapt and sustain the work

Use performance reviews and contingencies to adjust delivery, then transition rebuilds into ongoing operations.

DELIVERY LIFECYCLE

From rebuild to operations

- Assessment + planning
- Resourcing + execution
- Monitoring + transition
